

AGRICULTURAL UNIVERSITY OF ATHENS

Θέμα **Ευχαριστίες προς την τριμελή του Διδακτορικού μου**
 Αποστολέας Ioannis Galidakis <jgal@aua.gr>
 Παραλήπτης <pamfilos@math.uoc.gr>, <papadoperakis@aua.gr>, <bakis@aua.gr>,
 <dgatzouras@math.uoa.gr>, <vnestor@math.uoa.gr>, <atpalaioufalirou@astynomia.gr>
 Ημερομηνία 2021-06-04 15:14

Σεβαστή τριμελής επιτροπή, και φίλοι, καλημέρα σας,

Εξέφρασα τις ευχαριστίες μου προς εσάς για την έγκριση της Διδακτορικής μου διατριβής δημοσίως, στο:
<https://www.researchgate.net/>

Για την αναγνωστική σας απόλαυση, σας την παραθέτω και ιδιοχείρως:

The latest revision of my submitted Thesis, with approximately 800 references:

"The Problem of the Infinite Exponential"

was finally approved by my advisor, professor papadoperakis@aua.gr, and the rest of my advisory committee, bakis@aua.gr, and dgatzouras@math.uoa.gr.

It was approved only AFTER I managed to publish the latest supporting article:

Article ON THE ENUMERATION OF THE ROOTS OF ARBITRARY SEPARABLE EQUAT...

because professor papadoperakis didn't believe the HW functions-which give the partwise limits of the iterated exponential, were sufficiently supported/referenced via my previous publications of them in the journal Complex Variables, so he requested a specific publication, ONLY 8 YEARS AFTER my enrollment into the doctoral program and ONLY AFTER rejecting at least 5 valid research proposals by me during the first 2 years, which you can read on my profile. And that's the ONLY OFFICIAL REQUIREMENT by the Mathematics department at AUA, to get a Ph.D.: To have JUST ONE subsequent publication AFTER your enrollment date, besides your 400 already existing ones, which ALREADY support and are referenced in your Thesis.

--

My Thesis was given the following approval grades by the committee mathematicians:

papadoperakis@aua.gr: 10/10, by disappearing from the face of the Earth and not answering ANY of my emails or calls, since 2019, BEFORE the submission of the latest revised version of my Thesis and BEFORE the latest supporting article was published.

bakis@aua.gr: 10/10, by hiding under his office's desk 24/24 and NEVER answering ANY of my emails about my progress, throughout the ENTIRE 10 YEARS I've been here.

dgatzouras@math.uoa.gr: 10/10, by moving to a different PLANET's school for his quiet reading convenience of my Thesis, ONLY 3 years after reading my Thesis' first draft.

--

Btw, my latest Thesis supporting article, above (ON THE ENUMERATION...), was ALSO gratefully acknowledged as an important contribution, by the Internationally Famous Researcher of the University of Athens: Vassili Nestoridis (vnestor@math.uoa.gr), for allowing calculation of the a_n coefficients in his' "Universal Taylor Series".

--

I.e., if you want to FAIL MISERABLY your Ph.D. program or have your important work DOWNPLAYED, IGNORED, VANISHED or STOLEN like that of my Father's[1], come study at some of Greece's famous USELESS schools, full of INCOMPETENT mathematics professors, like the National Technical University of Athens (NTUA), Agricultural University of Athens (AUA) or the University of Athens (UA)

BEST of LUCK with your future studies in Greece and your Mathematics ResearchGate associates from Greece!

Yiannis Galidakis,
 d. cand., AUA,
 Lab of Mathematics & Celestial Mechanics

--

[1]: My Father's short Biography on how his Ph.D. was downplayed, stolen, and finally auctioned to the US government for cash, after his stolen/ignored Professorship in post-1974 Grecia.
