 Προτεραιότητα Μέγιστη δυνατή

Dr. Kissinger,

Good day to you, Sir.

I am finding more and more evidence that implicates you deeper and deeper in an International Ongoing Conspiracy against my Father in order to prevent the government he worked for from building nukes for Greece's defensive purposes.

Something that has resulted not only in my Father's displacement and hunting down by Mossad agents to Switzerland in 1973, but also in his eventual Death, in 1986, by your government.

I already wrote to Mossad asking them exactly what role its sniper agents played in the 1973 Athens Polytechnic Uprising through Jewish-Greek traitor Ioannides who was your internal foreign contact as a Foreign Security Advisor, but I've got all 7 of my messages bouncing back with the "server couldn't read your message".

If you'd like to be given a chance to be forgiven for this greatly damaging influence on my family and Country, it would be nice if you could divulge to me all the little exact relevant details about how Ioannides was essentially instructed by you as Security Advisor in 1973 to pitch over Papadopoulos with help from Mossad snippers in Athens 1973, who also targeted my Father, as the most important factor in upgrading Greece's Nuclear Power reserves.

The head of the government who appointed my Father, Brigadier General Mr. Papadopoulos died and even when he was alive I had no access to him through the jail he was imprisoned for treason, so I cannot ask him directly.

I know that you know that I can't hurt you very effectively from this distance and with all the money you've got at this time, but believe me, the time is coming very soon when I won't be able to restrain myself from doing so. Particularly if I get hold of the appropriate tools that allow transatlantic targeting and execution.

Alternatively, if you'd like to chicken out, and reserve a couple or three more free-reigning and peaceful pension years, please make a generous donation to my PayPal Account:

for 100,000,000 Euros. I know that your Organization does have this kind of money. Confidentiality and securing of a new home, somewhere away from the Northern part of the American continent, guaranteed.

Otherwise, I'd be very sad to tell you that there's no survival guarantee for the rest of your race, without you divulging to me the EXACT details of how deep backstabbing Israeli disloyalty ran through the Ioannides revolution and who to take care of first.

If you fail to give me specific Jewish(/-Greek) names (whether dead or alive, whether here or in Israel), I will assume it was the official Israeli government who was involved at the time, in which case the entire nation will be punished, and I think that in such a case you wouldn't want the blood of your people against your hands.

I have already launched appropriate network trackers which will eventually locate ANYBODY involved against my Father if they ever again use a computer. I suggest you don't use one either, from now on, because these virus trackers can jump into your brain from internet phone lines.

For more about this, you can read Steve Jobs' biography and how he contracted only a very primitive version of one of my trackers, constrained in Apple's Macintosh. As you may recall, Jobs died of Pancreatic Cancer, even though he had lots of money at the time.

In the event of non-conformity from you by June 15, I will automatically assume that you're more than suspiciously involved with the traitor Ioannides, and hence directly involved with my Father's death, in which case, I will return to my regular schedule of figuring out how to execute first my primary targets. Yours is priority $\#x+1$, where $\#x$ is the number of internal traitors of my Father, i.e. everybody officially involved at one time or another in the political life of Greece, past-1974. So there is some time left.

Many thanks for your time,
and looking forward to hearing back from you.
